Experience with Git Branching and Merging

Overview

This task provided hands-on experience with Git branching, merging, and conflict resolution.

Steps Taken

1. **Repository Setup:** Created and cloned a GitHub repository.
2. **Branching:** Created `feature-1` and `feature-2` branches, made changes to `shared.txt`, and committed them.
3. **Merging:** Merged `feature-1` into the main branch smoothly. Merging `feature-2` caused a conflict.
4. **Conflict Resolution:** Edited `shared.txt` to resolve the conflict and committed the changes.
5. **Cleanup:** Pushed the updated main branch and deleted the feature branches.

Challenges

- **Merge Conflicts:** Required careful resolution to ensure correct changes were retained.

Lessons Learned

- **Branching:** Useful for parallel development.
- **Conflict Resolution:** Essential for collaborative work.
- **Commit Messages:** Important for tracking changes.
